SUMMARY

I'm currently a Ph.D. candidate at McGill University & MILA, fortunate to be advised by Prof Jin L.C. Guo and Prof Xue Liu. My research interest lies in **Automated Feature Engineering for effectiveness, efficiency, and explainability**. I am also actively working on its application in various domains, including recommender systems, financial estimation, and software engineering. I work closely with industrial researchers from Microsoft, Tencent, etc. I am thrilled that my research has successfully transformed into product-line algorithms and made a difference in the world!

Before joining McGill, I got my bachelor's degree in Computer Science with Zhiyuan Honour Degree in Engineering from Shanghai Jiao Tong University(SJTU). I was advised by Prof Li Jiang for my thesis and worked with Prof Xiaokang Yang. I also had a great time at Nanyang Technological University(NTU), researching with Prof Weichen Liu.
